

How to initiate a dialogue with the wind?

DATE 2012

MEDIUM Paper windmill, electronics, industrial fan

SOFTWARE Arduino

AUTHORS & DEVELOPMENT Tobias Muthesius & Pierre Thirion,
Lab212

SYNOPSIS Appel d'Air is an installation providing its audience the opportunity to interact with wind. By blowing on a tiny paper windmill, users trigger an industrial fan. The wind's response is proportional in both duration and intensity to the input it received from the person who started the conversation.
