

*How, through a machine,
to propose an exquisite
sound corpse?*

DATE 2010

MEDIUM Microphone, computer, screen, sound system

SOFTWARE Arduino, AS3

AUTHOR & DEVELOPMENT Nicolas Guichard, Lab212

SYNOPSIS *Histoires Exquises* is an interactive installation based on the collaborative aspect of the exquisite corpse, inviting the public to participate to the creation of a evolutive story. Each visitor inherits the story imagined and narrated by previous visitors. Participating in the narrative, he influences the course of story, without being certain that their participation is guarded by his successors.
