

## *How to represent a musical motif in a surrealist universe?*

**DATE** 2017

**MEDIUM** Music clip

**AUTHOR & MOTION** Béatrice Lartigue, Lab212

**MUSIC** Chapelier Fou

**SYNOPSIS** The track Philemon begins a universe that is at once poetic, surrealist and heady. Composed around a musical motif of 6 notes played continuously, the melodic structure of the piece seems to stretch to infinity. Philémon evokes a surprising journey through time and space, punctuated by changes in rhythms, accelerations and decelerations... to finally find a state of balance at the end of the song. The atmosphere that emerges is bewitching and psychedelic.
