

*How to draw a path
through the woods
through the light?*

DATE 2012

MEDIUM Electronics, LEDs, wood

SOFTWARE Arduino

AUTHOR & DEVELOPMENT Nicolas Guichard, Lab212

SYNOPSIS Inspired by popular tales and legends, *Sirènes Sylvestres* seeks to make visitors feel deep and instinctive emotions related to the forest. The use of light as a means of expression makes it possible to enhance the natural environment without interfering with it. A system equipped with sensors allows the lights to be switched on and off as the visitor progresses.
